PRESENT STATUS OF BHOI COMMUNITY

SURESH APATE

Assistant Professor , D.K.Shinde School of Social Work CSIBER,
College,Kholapur.

Abstract:

BHOI Community :

The Bhoi Community folks area unit mostly Palki-bearers. but the Bhoi communities standing is way below the thought of society. In past day male members of Bhoi community were recognized as palkiescarrier. Whenever the kings had to travel for brief distance they were victimization palkies; however thanks to advent of kingdom and social organisation the standing of Bhoi community was derecognized because the kings of many places lost their power of administration. therefore Bhoi folks area unit scattered in several regions of geographic area. Consequently, Bhoi community folks were adversary affected as they weren't competent enough to be concerned in any trade than Fishing.

organization , documents , Right to information , electronic mode .

INTRODUCTION

PRESENT STATUS :

Education helps as was in seen is study that majority of the respondents each literate /HSC were opined that education helps in maintaining healthy relationship. It is finished that almost all of the male respondent from Bhoi community square measure literate and their first language was Sanskritic language. All the respondents were directly concerned in giving / taking dowery in any type either in money or kind as that they're not aware of dowery Acts, and consequence. the Bhoi community in Sangli district have settled down within the district for good and have prevented their wandering life. However, there was no correlations between the males and females noticed. Literacy, ignorance, superstitious notion and blind belief looks to own halting the method of some systems, sub systems and caste-religious teams. Classified because the Bhoi community in Sangli district square measure wandering tribe square measure backward in terms of education, finance, social and politics, the community is fashionable in terms of wedding there have been no divorces of any family within the community. Great majority of the respondents weren't aware of the existence of the family subject matter centers These respondents were able to cut back their monetary and social stress owing to their correct actions and development of democratic life method. It was additionally noticed by the investigator that the marriages of the Bhoi community individuals materialized inside the caste. Most of those respondents had settled the marriages of their members of the family with the consent of the each male and feminine members of family. Inter-religion and inter-caste marriages were terribly rare or exceptional.

Title: PRESENT STATUS OF BHOI COMMUNITY

Source:Review of Research [2249-894X] SURESH APATE yr:2013 vol:2 iss:6

Poor individuals area unit unable to put their older persons within the organization by paying monthly expenditure. In such things and conditions additionally the individuals of the Bhoi community in Sangli district area unit able to give smart services to the older persons with love and affections. People generally have accepted the conception of maturity home and made individuals are attempting to put the older persons in such organizations. the matter of older persons has become serious. lots variety of family issues have come back up and area unit arising within the society. The social atmosphere within the society has been spoiled during this twenty first century.

Respondents practiced distributing their work, among the relations and there's a control of tv on the event of the kids. There was a healthy relations among the neighbours of the respondents throughout field work. Majority of the respondents weren't acutely aware enough regarding supervision their children's regarding their education. for the event of the personalities of their kids. Most of the respondents of the community opined use non secular philosophy and use the social principles like truth, honesty and guarantees in their every daylife. A great majority of the respondents were having fishing business The feminine members of the Bhoi community had no freelance occupation of their female members and a majority of the respondents had taken efforts for instructional development and had taken advantages of scholarship for education either for themselves, for his or her kids or for his or her alternative relations. facilities provided to the Bhoi community or to the unsettled community and somewhat but half the respondents were aware of Govt. facilities for his or her business development. However, most of the respondents weren't aware of Govt.

Majority of the respondents rated their own community as forward community but associate degree equal appreciable % of the respondents rated their own community as backward in terms of rank, respect and culture development. Moreover, the non-public lake owner don't enable the fishermen to fish from their lakes and ponds. Fishing business in Sangli district is risky not attributable to snake biting and other forms of issues however it's thanks to low financial gain and insecured business. Though majority of the respondents opinioned that fishing business is profitable enough to eradicate the economic condition. The respondents have additionally dropped at the detected of the investigator that the rivers and little lakes aren't full with waters for twenty-four hours in twelve months. They aforesaid functions were organized for obtaining standing to the community and had no associations of the fishermen within the society. Almost all the fishermen used totally different measures for preventing risk of the occupation. folks quarrel and file police cases additionally. Their experiences have created them aware of the danger thanks to that they're seen exploitation these measures.

However, respondents living in urban aras have modified their typical thinking and perspective and that they are of the opinion that there's no damage in showing and recognizing the repose faith and repose caste marriages. Thus, we will say Bhoi community in Sangli district is typical in terms of caste systems and wedding practices and majority of the respondents had cordial relations with the opposite community. It is over that an amazing majority of the respondents opine that dowery system is deeply unmoving within the soil of India and Bhoi community is not any exceptional to that. they're interested to relish the organize marriages with their typical thinking, perspective and social status of the family standing. As majority of the respondents don't seem to be satisfactory financial gain from fishing business, which can flow from to less worth within the market or competition. Bhoi community during this twenty first century has not adopted the trendy wedding observe to curb the expenditure and to save lots of the labour, energy and time. The realties are projected up to the traditional practices owing to their age - previous mind up.

unremarkably they need , God fearing attitudes, negative attitudes blind and piousness beliefs belief and social evils, smart and unhealthy impact on the lifetime of the folks etc has created folks to believe smart and unhealthy, sorcery and that they consult sadhus for obtaining peace and facilitate to induce some solace. The respondents of the community used social boycott and social pressure strategies to resolve the issues. The investigator detected that their community youth had shaped youth Organizations. An overwhelming respondents of the community had expressed their religion and feelings that KHANDOBA is that the God of the community. a substantial per cent of the respondents adopted to the strategies like discussions, dialogues that helps to resolve their issues. Bhoi community isn't exceptional as they believe smart and unhealthy times, sorcery and consult sadhus for obtaining relief as alternative general class of individuals. Bhoi community prepare marriage between divorced boy inconsiderately of any community rules and regulation, which suggests they extend support. whereas women's organizations haven't been shaped.

Majority of respondents offer steering service to their kids for shaping their read, opinions, behaviouretc for maintaining the agricultural values, wherever one fourth of the respondents were seen not providing the steering service for maintaining the agricultural values. Respondents don't arrange for expenditure of the families but, a substantial per cent respondents conjointly arrange for family

expenditure. Thus it is terminated that awareness on the a part of public is terribly low in terms of the establishment of Social staff. Majority of respondents participate in finding the difficulties of the neighbourer. plenty of labor must be done on the a part of caseworker on this front. whereas the urbanites were virtually negligible and ruralites were found to be additional active in such tough scenario.

A great majority of the respondents were of they opinion that that they had sensible social and cultural standing within the community It is specific factor that the folks of the Bhoi community square measure acutely aware regarding their social and cultural standing. An overwhelming majority of the respondents were males and that they were heading their various families whereas solely a negligible percent of the feminine respondents were heading their families as they were windows. The dynamic westernized life vogue has still not touched this community regarding the cultures position. It looks that autochthonal culture has still internalized in their personalities through the standard human process. it's going to be done to their straightness and cultural background.

However an excellent majority of the respondents were of the opinion that individuals of Bhoi community generally don't settle for the guidance of the aged persons within the community regarding social behaviour, relations, adjustment, readjustment, settlement of dispute and for active the cultural values and sinuliash An overwhelming majority 72.67% of the respondents had sensible social behaviour and social relations inside and outdoors the community. 76.7% of the respondents were of the opinion that their community leaders offer guidance for resolution of their personal and family issues. Majority of the respondents expressed their feelings and experiences on however the elders family vie their roles to guided them in administering their families and developing the personalities of the members. 65.67% of the respondents acceptive the steerage of alternative community leaders for his or her socio-cultural development.

A majority of the respondents were of the opinion that the relations within the in-laws families area unit usually sensible and friendly and not strained. A large range of the respondents were of the opinion that stinginess and greediness area unit the most reasons of giving and taking dower A majority 55.66% All the respondents were directly concerned in giving / taking dower in any type either in money or kind as they're not aware of the consequences , and its consequence. of cases doesn't in exist, it should result to cultural practices and understanding of the human life, maturity, matching the character of the male - feminine personalities and sensible sanskar of their folks members of the family, friends, relatives and neighbours. 58.00% of HSC educated respondents had a planned saving for future dower. it's thus necessary to coach them regarding effects of dower. On different hand a majority. It indicates clearly that the role conflict in majority 70.67%. This reveals that education helps in dynamical the outlook and trust their health and development.

It is seen that nice majority of the respondent weren't privy to the existence of the family counselling centers as conjointly Majority of the respondents were privy to the family desires and issues An overwhelming majority of the respondents families had progressive development in their occupation, earning and infrastructure Majority of the respondents were ready to cut back their money and social stress simply because of their correct actions like development of democratic life method. It was seen that an excellent majority of the respondents had adjustment and readjustment learning ability Most of the respondents were of the opinion that the relations wont to tell spiritual and social stories to the kids in their individual families for developing their personalities and for that they conjointly wont to take away the negative feelings from their minds. A majority of the male respondents were within the age-group of thirty one to sixty years whereas a negligible per cent were within the cohort of forty one - fifty years.

it's seen that the good majority of the respondents were of the opinion that the daughters have gotten right to say property It is seen that the majority of the respondents ninety seven per cent were able to fulfill all the minimum wants of the senior persons in their individual families It was found that the majority of the respondents were able to resolve the issues of the senior persons in their individual families with the assistance of straightforward dialogues , love and tenderness. Majority of the respondents spent immense cash within the marriages of their kids It may be same that the bulk of the respondents were of the opinion that the psychological science and social science of the individuals of the Bhoi community is developing for the straightforward marriages. An overwhelming majority of the respondents were seen concerned in development of the personalities of their kids. Majority of respondents gave steerage and helped their the neighbors in correcting the behaviour of youngsters it had been because of the very fact that they'd not got chance as each respondents was different wise found to be co-operative and understanding. It was seen that the bulk of the respondents within the Bhoi community still had ancient feeling of getting male within the families for continued their race.

A great majority of the respondent had their monthly financial gain from fishing business throughout the season was between Rs. Majority of respondents have completed sensible education and obtained the duty, However, a lesser percent of respondents were at leisure despite the fact that they were

educated. A great majority of the respondents were of the opinion that the steering service in and out of doors the community was provided to them throughout their crisis amount. However, Majority of the respondents opinioned that alligator was the foremost significant issue of the fishermen. Majority of the respondents weren't aware the information regarding the formation of the unions either in Sangli district or in the other places within the country. A majority of the respondents were of the opinion that the government. Majority of the respondents had a watercourse and lake fishing is finished in a very huge manner close to by 66. A majority of the respondents had no monetary directions within the society meant for developing their business. An overwhelming majority of the respondents business had conventions i. Most of the respondents had sensible, moderate and harmonious relations with the opposite religions and caste teams individuals.

Nor did the respondents calculate the earnings and therefore the expenditure of the members of the family of rural and concrete families in distributing it for justice homeward-bound family administration. Majority of the respondents were seen not getting ready the monthly family budget or each urban it's and ruralites were seen saving cash either for brief term or long run amount from their monthly or annual earnings. A majority of the respondents were unaware concerning the monetary establishments started by the Bhoi community. An overwhelming majority of the respondents had work distribution and were sharing responsibilities and conjointly who had below gone birth prevention operation. A great majority of the respondents had no plans created for expenditure of the families. Majority of the respondents were seen collaborating within the difficulties of their neighbors. Majority of respondents thought-about state as their main drawback within the community. However, a larger majority of the respondents from rural area had the issues of financial condition and low financial gain. However, it had been seen that the urbanites were nearly negligible compared to ruralites who were found to move in such difficulties of the neighbors. Respondents were seen not inquisitive about such difficulties of the neighbors. Great majority of the respondents had no vehicles in the slightest degree.
