TIME BANK – SATURN – ASTROLOGY

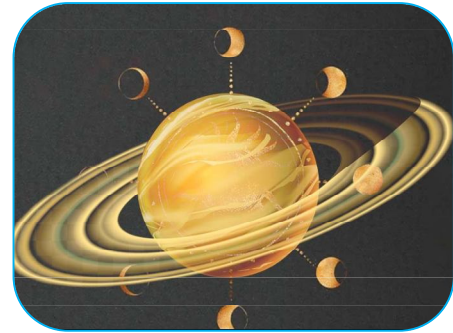

Dr. N. Chandra Shekar
Ph.D., D.Litt.

During my palmistry Guru's friends and peers group discussions in mid and late 70's who were all dedicated patrons of astrology and palmistry in those days itself, I used to hear from a wise man, that,
Knowledge of future coming from past is projections
Knowledge of future coming from present is predictions
Knowledge of future coming from future is prophecies,

And I was allowed to sit silently in a corner and listen to all their discussions as part of learning process, this used to happen once in 6 months or 8 months whenever everybody found it convenient to sit together for a discussion. I did not

understand anything of it then – later as my learning went on, I understood this can happen in one of the 11 dimensions of Time where past is before present and present is before future, and we astrologers are all kind of Mental Time Travelers in that dimension of Time, and great examples of this are Dr B. V. Raman who gave highest number of future predictions accurately on global events. Very well known in southern India as Kaala Jnani Kaivara Thathaiah (born in Karnataka during 1726) who saw Future of National and International significant and important events from his Time. French seer Nostradamus (Born December 1503) known in entire world for his predictions and prophecies.

The reason for exponential growth of "Knowledge and Knowing" since 1962 – i.e., the beginning of "Kumbha Yuga" which lasts 2000 years is the processing power of known and available data of this creation has gone up Trillion times, and that is the main reason for extraordinary outflow of ideas from human minds. A little more than a century ago ideas of human society had come out once in 50 years which made a significant change in the progress of human society. But now the situation is Yesterday's idea is old today and Today's idea may be dead by tomorrow. Such a processing speed has come into Vogue.

Time Bank–

Where humans can trade their living time - meaning draw their time or debit their time – because your time is the only thing where you can have real ownership in this creation. In the words of a famous palmist of last century Noel Jaquin, "The only thing you have is YOUR TIME– It is yours nothing else is yours, so spend it cautiously and wisely" Noel Jaquin advised. In that context in ancient India during 4th century A.D time trading concept was there in a different form – i.e. by reciting "Charama Sloka" which is highly customized Sloka as mentioned in Sanskrit literary works – If the living hears customized 'Charama Sloka' with the word 'DivamGathe' there time would end on this earth and similarly if the clock stopped or zero time balance person hears the customized reversal of 'Charama Sloka' with the word 'BhuvamGathe' in it then the person's life clock would start again to tick and work

with regained limited life extension. The classic example of this customization of 'Charama Sloka' with the words 'DivamGathe' and 'BhuvamGathe' in respective Slokas is Kavi RatnaKalidasa and his King Bhoja Raja of 4th century AD in India where they traded their times to each other out of pure respect for each other and committed friendship as a King and Poet, both were blessed by MotherKaali. Of course, the future time bank concept will be modified according to the needs of 'Kumbha Yuga' and Kumbha Yuga Time Bankers may invent their own methods of time banking out of necessity and customization.

Privacy And Transparency–

There will be serious fight between "Champions of Privacy" and "Champions of Transparency" of humans and their lives anywhere on earth and in space during Kumbha Yuga.

Artificial Intelligence –

May be used for Simulating and Manipulating Human Emotions are very high because human emotions are all the same in the entire world which makes it very easy to manipulate along with creating or destroying humans' life in this world.

Future's Spirituality –

Most of the learned men and women of Kumbha Yuga may show keen interest in studying the vast darkness of this creation than develop interest in studying light in this creation and try to understand Prakriyas that happen in darkness and may attempt to understand secrets of this creation that are lying hidden in vast darkness of space.

Spirituality of future will be born from the vast darkness of space because the dark space holds many secrets as in ancient India's 'Spirituality' was born in darkness of dense forests of this part of the earth and the seeds of Indian civilization and culture came from "Aranyakas".

Astrology Of Future –

Astrology of Kumbha Yuga will go beyond our earth's calendar-oriented astrology and may develop into a "Cosmic Calendar" oriented astrology for the benefit of space travelers – our earth's astrology is calendar oriented and calendar conditioned humans, so astrology of future is for space travelers and space-oriented beings or may be for aliens from outer space – Jeevis from Anya Grahas.

The Shubha Muhurta or the minimum period of auspicious influence in calendar oriented human lives is 48 mins of earth time. The maximum period of auspicious influence is One – Hundred – And – Eight years for space events in future which is going to be a rare and inclusive in 'Cosmic calendar' oriented astrology on earth by human's astrologers itself as mentioned in an old compendium of ancient Indian astrology and other related allied texts.

In simple words – For earth events it is 48 mins Muhurta and for space events it is 108 years Muhurta because earth's calendar is totally different in Time Scale from 'Space Calendar' or 'Cosmic Calendar' which is belonging to another time scale in this creation, this should help us to understand that there are different time scales in this creation and our ancient Indians Shastragnyas have studied different TIMESCALES of this Brahmanda. Apart from Navagrahas of our Solar system which shows our ancient Sages invested their earth time in studying Space Time Banks or Cosmic Time Banks – otherwise they would not have written about different time scales in cosmos. They just did all this mapping the entire cosmos in their conscious minds during Tapas and sages pronounced AKHILANDA KOTI BRAHMANDA PALAKA is Lord VENKATESHWARA. Finally, I opine we are in the 'Kala Garbha' of Kumbha Yuga with Foetus steps(not baby steps) and in Tuition stage but not in Intuition stage to understand anything about the cosmos well.

In Conclusion, we may say GOD IS THE ULTIMATE 'TIME BANKER' and in His 'Time Bank' we are all account holding customers who debit and credit our time on this planet called EARTH. And Mighty Saturn is the God appointed OMBUDSMAN for God's Time Bank for Kumbha Yuga or Aquarian Age for the purpose of purifying humans through their Karma accounts in Time Bank and that is the reason why Time Bank Concept is going to be popular one in Kumbha Yuga. Time Banking concept is

likely to gain currency of importance and become more and more prominent in humans' welfare activities in Kumbha Yuga.

Dr. N. Chandra Shekar

Ph.D., D.Litt., is into Astro-Palmistry and Gems for the last 50+ years and is known as 'People's Astrologer' who has presented and published 125 articles from "Spirituality to Sexuality" pertaining to Astro-Gemology by working with 52 publications around the world. He is widely appreciated for his contributions of more than 50000 counselling sessions globally. His work is recognized by 33 global educational bodies. He is recognized as 'one man university" by an highly experienced managing editor at several international publications and by some of his contemporaries and senior astrologers as well as 'Asthana Vidhwan' from Kanchi. He has done GEM SELECTION for a globally viewed and appreciated "Ceremonial Jewellery" outside India. His knowledge on vegetarianism was appreciated and encouraged by Hon.Smt.Maneka Gandhi, Central Minister in 4 governments through 'People for Animals' forum during 1995.
