## SOCIAL AUDIT OF NATIONAL RURAL EMPLOYMENT GUARANTEE SCHEME IN SOLAPUR DISTRICT

Dr. S. V. Shinde

Associate Professor , D. A. V. Velankar College of Commerce, Solapur.

### ABSTRACT :

*National Rural Employment Guarantee Act 2005 (or, NREGA No 42, later renamed as the "Mahatma Gandhi National Rural Employment Guarantee Act", MGNREGA), is an Indian labour law and social security measure that aims to guarantee the 'right to work'.*

*It aims to enhance livelihood security in rural areas by providing at least 100 days of wage employment in a financial year to every household whose adult members volunteer to do unskilled manual work.*

### INTRODUCTION :

The act was first proposed in 1991 by Narasimha Rao. In 2006, it was finally accepted in the parliament and commenced implementation in 200 districts of India. Based on this pilot experience, NREGA was scoped up to cover all the districts of India from 1 April 2008.

The MGNREGA was initiated with the objective of "enhancing livelihood security in rural areas by providing at least 100 days of guaranteed wage employment in a financial year, to every household whose adult members volunteer to do unskilled manual work". Another aim of MGNREGA is to create durable assets (such as roads, canals, ponds, wells). Employment is to be provided within 5 km of an applicant's residence, and minimum wages

are to be paid. If work is not provided within 15 days of applying, applicants are entitled to an unemployment allowance. Thus, employment under MGNREGA is a legal entitlement.

MGNREGA is to be implemented mainly by gram panchayats (GPs). The involvement of contractors is banned. Labour-intensive tasks like creating infrastructure for water harvesting, drought relief and flood control are preferred.

Apart from providing economic security and creating rural assets, NREGA can help in protecting the environment, empowering rural women, reducing rural-urban migration and fostering social equity, among others."

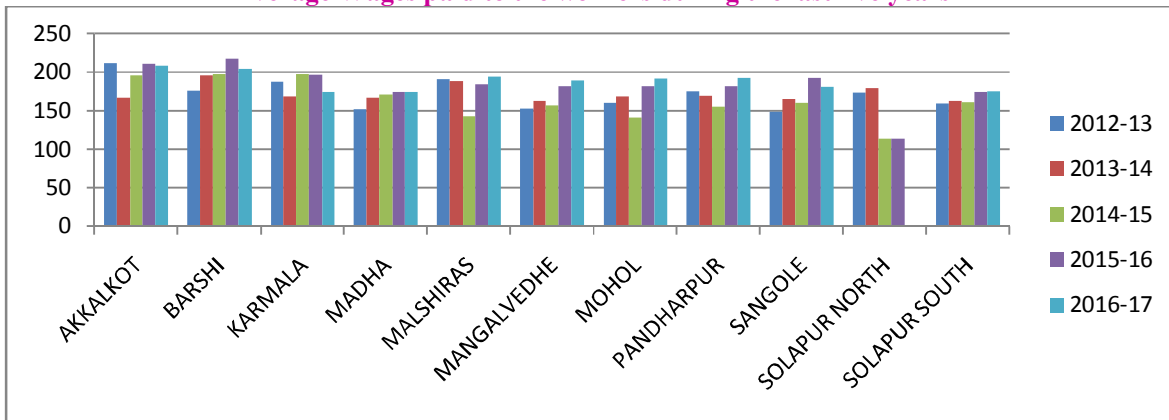

The law provides many safeguards to promote its effective management and implementation. The act explicitly mentions the principles and agencies for implementation, list of allowed works, financing pattern, monitoring and evaluation, and most importantly the detailed measures to ensure transparency and accountability.

**Table Number 1- Average Wages paid to the workers during the last five years**

**Graph Number 1  
Average Wages paid to the workers during the last five years**

In above table and bar diagram average wages paid to the persons those who had registered under the scheme NAREGA is shown for the year 2012-13 in Solapur District. Year wise payment of average wages is shown for the better understanding of the process and trend of payment to the persons of the NAREGA. In 2012-13 in the Talukas of Solapur District the average payment to the person was Rs. 171/- In the year 2012-13 in Akkalkot, Barshi and Karmala there was more than average payment to the labour. In these talukas the authorities were paying more than Rs. 171/- and in Mangalwedha, Mohol and in Solapur South taluka the authorities were paying below average payment (the average payment during the year 2012-13 was Rs. 171/- per day). In the month of September, October and November there was more payment of wages to the persons. It may be due to the religious activities of the society, in such months average payment was Rs. 176/- and there was low payment in the month of April and May the payment in such months were Rs. 154/- and Rs. 161/- respectively.

In Akkalkot Taluka there was more payment to the persons, it was averagely Rs. 210.92/- for the year 2012-13 and in Sangole Talukas there was very low payment to the persons as compared to all rest 11 talukas, it was only Rs. 148.33/-. The highest amount paid in Akkalkot Taluka was Rs. 244/- per day in the month of October and in Malashiras Taluka there was very low payment to the persons those who have registered in NAREGA, it was something Rs. 102/- per day.

The main reason that the persons were not willing to join NAREGA is that in this scheme there was very low payment for the labour. Per day average Rs. 171/- is not sufficient in this global world therefore it was need to increase in the scale of payment during the period 2012-13.

In the above table average wages paid to the workers in the scheme is shown. This data is related to the financial year 2013-14. In the above table data for the 11 talukas has been shown. The data is divided into 12 months (from April 2013 to March 2014). In this financial year in the month of July and August in the taluka Malashiras highest wages is been paid to the workers the wage rate was 226 and 221 respectively.

In the month of January 2014 in Barshi Taluka the highest wages is paid it was 235. The rate of low payment of wages is very low in South Solapur Taluka. In the months of April, May and July there was very low payment to the workers it was around 150 average. This position was there in Karmala in October month and in Sangole in the month of July of this financial year.

In this financial year under this scheme there was average 172.11 payment to the workers. Taluka Barshi, Malashiras and Solapur North are paying more than average rate as stated in earlier line and from the data obtained in the table it is clear that in the month of March, 2014 there was above average payment in near about all the talukas.

From this it is very clear that at the end of the year the workers are getting more payment as compared to earlier 11 months of the year (April to February). The above data is related to the financial year 2014-15. In this table the average wages paid to the workers is shown under this scheme. For this particular year the workers are getting Rs. 162/- as wages per day in all 11 talukas. In this year in the Karmala taluka more highest wages is paid in the month of October and November respectively it was Rs. 260/- and 296/- and in the month of March 2015 in the Solapur North taluka Rs 272/- is paid to the workers as wages it was the second highest wage payment to the workers in this year.

From the above table it is very clear that in the month of November there was no wage payments to the workers of this scheme in 7 talukas and in North Solapur Taluka form the month of October to February there was no wage payment. In Sangola Taluka there was the lowest payment in the month of July. It was only Rs. 143/- average per day to the workers. In the beginning of the year i.e. in the month of April there was also very low rate of payment to the workers in the month of April 2014 there was average payment around 171/- (Very low in Malarashiras, Sangole and Solapur North Taluka). The above table and explanation is shown in the following bar diagram for the better understanding.

The above data is related to the financial year 2015-16. In this table we the average wages paid to the workers is shown under this scheme. For this particular year the workers are getting Rs. 182/- as wages per day in all 11 talukas.

In this year in the Barshi taluka is paying highest wages in the month of November, December and January it was Rs. 256, 259 and 238 respectively and in the month of April 2015 in the Akkalkot taluka Rs 226/- is paid to the workers as wages it was the second highest wage payment taluka to the workers in this year.

From the above table it is clear that in the month of October to February there was no wage payments to the workers of this scheme in North Solapur Taluka. In Solapur South Taluka there was the lowest payment in the month of November, January and March. It was only Rs. 119, 134 and 132 respectively.

In the beginning of the year i.e. in the month of April there was also very low rate of payment to the workers in the month of April 2015 there was average payment around 191/- which is above average as compared to the year. The above table and explanation is shown in the following bar diagram for the better understanding.

The above data is related to the first quarter of financial year 2016-17. In this table we the average wages paid to the workers is shown under this scheme. For this particular quarter the workers are getting Rs. 188/- as wages per day in all 11 talukas which is highest as comported to all the last years. In this year in the Akkalkot and Barshi taluka are paying highest wages in the month of April and May it was Rs. 211, and 207 respectively.

From the above table it is clear that in the month of April, May and June there was no wage payments to the workers of this scheme in North Solapur Taluka. In Solapur South, Sangole and in Madha Taluka there was the lowest payment in the month of April 2015. It was only Rs. 143, 160, 159/- respectively which is very low as compared to all the 12 months of the year. In the beginning of the year i.e. in the month of April there was also very low rate of payment to the workers.

If we compare all the above years it is find out that in the current year the workers are getting more payment. The above table and explanation is shown in the following bar diagram for the better understanding.

The above table is related to the year 2012-13 to 2015-16. Which is related to attendance of the workers in this scheme. In the table the household employed and person day generated is shown. The above mentioned data is consist of 11 talukas of Solapur district. In Karmala, Madha and Mohol talukas of Solapur District there was highest household employed and person days generated it was 10116, 12173 10294 and 397605, 707871, 647993 respectively. It was very low in the Malashiras, Mangalwedhe and South North talukas. It was 1988, 1910, 1299 and 85958, 50187, 45687 respectively.

Average there was 5524 household employed and 268704.54 person days generated during the year. Karmala, Madha, Mohol, Pandharpur and Sangole talukas was above average in household employed and Karmala, Madha, Mohol, and Sangole talukas was there above average in person days generated. Akkalkot, Barshi, Malariras, Mangalwedha, Solapur North and Solapur South talukas was there below average in both household employed and person day generated.

The above table is related to the year 2013-14. Which is related to attendance of the workers in this scheme. In the table the household employed and person day generated is shown. The above mentioned data is consist of 11 talukas of Solapur district. In Madha, Mohol and Pandharpur talukas of Solapur District there was highest household employed it was 10327, 4172 and 3492 respectively. In Barshi, Mohol and Pandharpur there was highest person day generated it was 160804, 559651 and 116310 respectively. It was very low in the Malashiras, Mangalwedhe and South North talukas. It was 514, 1421, 799 and 16772, 34811, 17198 respectively.

Average there was 3029 household employed and 119895 person days generated during the year. Barshi, Madha, Mohol and Pandharpur was above average in household employed and Barshi and Madha was there above average in person days generated. Akkalkot, Kalmala, Malashiras, Mangalwedha, Sangole, Solapur North and Solapur South was there below average in both household employed and except Barshi and

Madha taluka all talukas was there below average person day generated. The above shown table is shown in line diagram for better understanding graphically.

The above table is related to the year 2014-15. Which is related to attendance of the workers in this scheme. In the table the household employed and person day generated is shown. The above mentioned data is consisting of 11 talukas of Solapur district. In Akkalkot, Barshi and Madha talukas of Solapur District there was highest household employed it was 2012, 3314, 3992 respectively. In Akkalkot, Barshi and Madha there was highest person day generated it was 88586, 186253, and 119777 respectively. It was very low in the Malashiras, Mohol and Solapur North talukas. It was 150, 215, 110 and 3084, 9375, 2717 respectively.

Average there was 1345 household employed and 53445 person days generated during the year. Akkalkot, Barshi, Karmala and Madha was above average in household employed and in person days generated. Malashiras, Mangalwedha, Mohol, Pandharpur, Sangole, Solapur North and Solapur South was there below average in both household employed and average person day generated. The above shown table is shown in line diagram for better understanding graphically.

The above table is related to the year 2015-16. Which is related to attendance of the workers in this scheme. In the table the household employed and person day generated is shown. The above mentioned data is consist of 11 talukas of Solapur district. In Akkalkot, Barshi and Karmala there was highest household employed it was 1229, 3504, 1630 respectively. In Akkalkot, Barshi and Karmala there was highest person day generated it was 40840, 91229, 52352 respectively. It was very low in the Malashiras, Pandharpur and Solapur North. It was 143, 147, 225 and 5514, 7963, 2122 respectively.

Average there was 914 household employed and 25647 person days generated during the year. Akkalkot, Barshi, Karmala and Madha was above average in household employed and in person days generated rest all talukas are below average. The above shown table is shown in line diagram for better understanding graphically.

The above table is related to the financial year 2013-14. In the above table status of disabled person is shown. The above table consists of 11 talukas of Solapur District and divided in to three parts i.e. number of disabled persons registered in NREGA, number of disabled persons worked in NREGA in financial year 2013-14 to 2016-17 and person days generated through disabled persons.

In this year in Malarhiras, Sangole and in South Solapur Taluka of Solapur District there was highest number of registrations of disabled persons it was 291, 69 and 61 respectively.

In Akkalkot, Mohol and Solapur North there was very low registrations of disabled persons it was 6, 10 and 15 respectively. In 2013-14 on an average 57 disabled persons are registered in this scheme. In

Malashiras, Pandharpur, Sangole and Solapur South talukas there was above average registrations and in all rest talukas there was below average registrations of disabled persons.

In Madha, Pandharpur and South Solapur talukas highest disabled persons have been worked in this particular financial year. In Akkalkot, Mangalvedha, Mohol and in Solapur North taluka there was very low disabled persons worked under this scheme.

The above table is related to the financial year 2014-15. In the above table status of disabled person is shown. The above table consist of 11 talukas of Solapur District and divided in to three parts i.e. number of disabled persons registered in NREGA, number of disabled persons worked in NREGA in financial year 2014-15 and person days generated through disabled persons. In this year in Malarhiras, Pandharpur, Sangole and in South Solapur Taluka of Solapur District there was highest number of registrations of disabled persons it was 291, 61, 69 and 61 respectively. In Akkalkot, Mohol and Solapur North there was very low registrations of disabled persons it was 6, 13 and 15 respectively. In 2014-15 on an average 57 disabled persons are registered in this scheme it was same in earlier year i.e. 2013-14. In Malashiras, Pandharpur, Sangole and Solapur South talukas there was above average registrations and in all rest talukas there was below average registrations of disabled persons.

In Barshi, Madha, Pandharpur, Solapur South talukas highest disabled persons have been worked in this particular financial year. Except Barshi, Madha, Pandharpur, Solapur South taluka there was very low disabled persons worked under this scheme. Average 2 disabled persons were working under this scheme in all the talukas of Solapur District. In this year the working ratio is grown compared to last year. In last year it was 4.

The above table is related to the financial year 2015-16. In the above table status of disabled person is shown. The above table consist of 11 talukas of Solapur District and divided in to three parts i.e. number of disabled persons registered in NREGA, number of disabled persons worked in NREGA in financial year 2014-15 and person days generated through disabled persons. In this year in Malarhiras, Sangole and in South Solapur Taluka of Solapur District there was highest number of registrations of disabled persons it was 291, 69 and 62 respectively.

In Akkalkot, Mohol and Solapur North there was very low registrations of disabled persons it was 6, 13 and 15 respectively. In 2015-16 on an average 57 disabled persons are registered in this scheme it was same in earlier year i.e. 2014-15. In Malashiras, Pandharpur, Sangole and Solapur South talukas there was above average registrations and in all rest talukas there was below average registrations of disabled persons.

In Barshi, Madha, Solapur South talukas highest disabled persons have been worked in this particular financial year, it was 3, 6 and 6 respectively. Except Barshi, Madha, Mohol, Solapur South taluka there was very low disabled persons worked under this scheme, it was equal to zero. Average 1 disabled person were working under this scheme in all the talukas of Solapur District. In this year the working ratio is decreased compared to last year.

The above table is related to the financial year 2016-17 up to June 2016. In the above table status of disabled person is shown. The above table consist of 11 talukas of Solapur District and divided in to three parts i.e. number of disabled persons registered in NREGA, number of disabled persons worked in NREGA in financial year 2016-17 and person days generated through disabled persons. In this year in Malarhiras, Sangole and in South Solapur Taluka of Solapur District there was highest number of registrations of disabled persons it was 291, 69 and 62 respectively.

In Akkalkot, Mohol and Solapur North there was very low registrations of disabled persons it was 6, 13 and 15 respectively. In 2016-17 on an average 57 disabled persons are registered in this scheme it was same in earlier year i.e. 2015-16. In Malashiras, Pandharpur, Sangole and Solapur South talukas there was above average registrations and in all rest talukas there was below average registrations of disabled persons.

In Barshi and Solapur South talukas highest disabled persons have been worked in this particular financial year and it was equal to one. Except Barshi and Solapur South taluka there was very low disabled persons worked under this scheme it was equal to zero.

Average 1 disabled person was working under this scheme in all the talukas of Solapur District. In this year the working ratio is constant as compared to last year. In last year also it was 1. The above table is graphically shown as under:
