

STABILITY OF HIGHER EDUCATION AGAINST CHANGE

Dr. Ajita Jagdishbhai Jani
M.A., M.Ed., M.Phil., Ph.D.

1.0 INTRODUCTION :

human life is a learning process. Through education he tries to learn new traditions of society. We can classify education into formal and non-formal pattern. In formal pattern of education we learn from schools. But by informal way we learn from home, society and state also. There is an important role of society and state for higher education. In present time there are many types of threats among higher education. Now we will discuss about stability of higher education against change.

2.0 DIFFICULTIES IN HIGHER EDUCATION FOR STABILITY AGAINST CHANGE :

In present time higher education is passing from many types of problems. If higher education can solve the problems, it can be success in changing time. Here we discuss about some difficulties among higher education which should solve by higher education for stay with society and state.

(1) FINANCIAL STABILITY :

In old type of education there was no more need of financial aspect There was no big building, libraries, laboratories, and also big budget ! But in present time physical and economical facilities are necessary for higher education. In present time higher education going towards privatation, In this situation higher education should be financial power fully.

(2) ADMINISTRATING STABILITY :

In present time there is no qualified administrators in higher education at private level ! For private trusts, education is only business. So they appoint their staff which is non experienced. Higher education can success with powerful administration in changing society.

(3) DEARTH OF TRAINED TEACHERS :

Trained teachers and administrators are not available in present time. It is a truth that who is work expert is not educated and educated person is not work expert in his subject or work ! so it is necessary for higher education to appoint qualified persons.

(4) VOCATIONAL STAYBILITY :

In present time higher education can't provide vocational job to their students. A students can't choice his own vocational subjects at higher level, and they didn't get setisful work after getting higher education. So it is necessary to change in higher education subjects.

(5) LACK OF GUIDANCE :

Lack of proper guidance all the students selects common streams. It's example is- In time of Jawaharlal Nehru there was a demand of Technology education. In time of shree shashtri there was a demand of farmerey education and in present time all the students selects teacher education. So it show lack of proper guidance. Higher education should give proper guidance and opportunity to students.

(6) STABILITY OF EDUCATIONAL REFORM :

In present pattern of education there is short duration time for higher education. If educational system is very good, but in short time we can't teacher students properly. So day by day level of education is going down and down. It is not lack of students but it is a falt of education system. Higher education should be long term education.

(7) SCOPE OF WORK EXPERINCE :

The point of view of work experience, it's design is looking different every were as situation of local level. There is no similar pattern of work experience of higher education, So it is threats against higher education to give same work experience to the students.

3.0 WHAT SHOULD BE DON BY HIGHER EDUCATION ?

We can say certainly that higher education system, five years plans, syllabus are also great. But some problems against it. To solve the problem what should be done by higher education ? Some suggestions are as follow :

(1) Guidance Centers :

Before a student start higher education, higher education should open guidance centers for students and they should give proper guidance about higher education, their time limit, their optional subjects, possibility for a job etc. This type of guidance centers are helps to student to select proper decision.

(2) Type of curriculum :

At higher level there should different types of subjects. curriculum of higher education should includes languages, social science, maths and history, geography etc. There should scope for word experience based subjects in higher education curriculum, and they are able to promote vocational work.

(3) Emphasis on examination and practical aspects :

In higher there should not only yearly exams but giving extra expriance higher education should arrange different types of competitive exams in schools. And their aspect should on practical based. During exam and after it their students are guided property for their problem solution.

(4) Changing the attitudes of student and society :

There should change attitude of students and society for higher education. It is necessary to give proper and true matter of higher education system to society.

(5) Changes in teacher education :

If teacher education is change as need of society, and their students will trained as demand of new trends, higher education can be success. After giving proper training to teacher trainee than any type of system, curriculum, teaching aids are success in practical.

4.0 CONCLUSION :

We know that education and society are two side of coin. Education can change society - society has its own thoughts, traditions. But education should be change with changing time and demand with society. Higher education has caught new challenging threats to be success in present time.
