INTRODUCTION:

During the adjustment of the society around physically challenged people, there is a special social condition that occurs and checks whether these conditions are characterized by social problems, such as those formed around physical disability.

Physical disability is not extinct from society. They are a part of the society. They are seen living in the community living in the community. Physical disability also interacts as a member of the society. It is coated with the social relations of the society, but such persons with physical disability cannot play a role similar to that of ordinary people. There is a difference in the thoughts of the behavior of the person

PHYSICAL DISABILITY IS A SOCIAL PROBLEM

There are some people in society who are not able to play the role of ordinary members in the society. Because of their physical mental impairments, their physical mental strengths are limited to such physical or mental defective individuals are generally identified as physically inefficient, physically challenged persons cannot properly develop their development due to their inability, whereas a person with mental inability cannot play their role properly.

- A barrier to the spirit of psychological security
- Constraints in intersection
- Basic life barrier
- Aesthetic barrier
- Professional life barrier
- halconal obstacle
- Block all-round development of a person

Different types of physical disability impairments cause different obstacles in one's life, causing some problems in his life, due to physical disability of any kind; these children do not develop altogether, so they cannot play their role properly as a normal person in society.

Some psychological problems arise due to physical inefficiency due to some physical weaknesses due to physical defects, lack of confidence in physically disabled people, from reality to distinction, disappointment, distortion of emotions, feelings of contraction in social interactions, negative attitude towards society. So their personal and face-to-face That impede the development of life. However, if there is education and training, then there is a certain difference in these problems.

Physically challenged people who receive appropriate education and training also experience some difficulties in getting a suitable business due to their inability. Focusing on choosing a right profession failure to give true recognition of their power due to the fact that they are unable to develop their rightful productivity and creative ability due to the above difficulties due to the negative thinking towards physically challenged people in the employment donors. Professional field The appropriate role is played too often they fail

Despite the efforts of the government and the voluntary organizations, there is still no spread of education in physically challenged people, due to which some educational problems are main. Inappropriate academic environment, unaware parents, untoward workers, lack of useful resources and some of the physically disabled people in society, whatever the perspective and the child's own disappointing negative impact on education are very important. The physically disabled children who live in rural areas and especially the illiterate parents experience a special educational problem. Despite being completely intelligent enough to be completely physically challenged, it cannot achieve the education according to his desire because of the flexibility of his movement. Therefore, the opportunity to get the right status in the society is also limited to physically challenged people
