STUDY OF EDUCATIONAL MOBILITY IN TRIBAL WOMEN – SPECIAL REFERENCE TO TRIBES OF SURGUJA IN CHHATTISGARH

Dr. RavindraNath Sharma

Head Sociology & Social Work, Shri Sai Baba Aadresh College, Ambikapur, Distt.-Surguja, Chhattisgarh.

ABSTRACT:

Tribal society has been backward due to countries of living away from the main stream of society for this reason their social cultural economic and political development has not been smoothly developed. Today the requirement is that efforts should be made to include them in main stream. However due to the efforts of government and many self help group, their situation has improved considerably for the development of any society improvement in education. health and employment situation is absolutely essential but in the research paper, women beginning to tribal society have been studied with awareness and affection for their education.

KEYWORDS: *Divination tribal development.*

INTRODUCTION

the study presented is selected from two college students of two development blocks of tribal dominated surguja district of Chhattisgarh state by selection methods. education provides a pate to any social progress and property not only is it the progress of employment opportunities but social cultural and consciousness opens. All the schemes of development are unable to achieve their goods due to this awareness and consciousness. creates planes by spending millions of rupees per year but the full good is not achieved. If we have to raise the tribal society at equal level then the level of education will be

increased arrangement of practical and employment oriented education.

Table No. 1.1
Information about women after study

S.No.	Opinion	Frequency	percentage
1	yes	99.33	112
2	No	4.17	05
3	don't know	2.5	03
		120	100

Table No. 1.2
study assistance opinion

S.No.	Opinion	Frequency	percentage
1	yes	105	87.50
2	No	13	10.84
3	don't know	02	0.16
		20	100

RESULT AND INTERPRETATION

The result obtained from the study presented is as follows. If we observe the table no. 1.1 then we find that about 98 percent of respondents are studied, 58 percent of them are respondents of rural areas. While the remaining 42 percents of the urban area.

When these students asked. If they got their support from their parents and mothers father for this than 87 percent of vote is yes. While 12 percent did not have. these all respondents belongs to rural areas. When the search tried to know that they did not get the cooperation. then 86 percent responded asked that their financial condition was not so good that they could not affords to spends the higher education here there is a lack of awareness among these respondents

because The government has made the provision of free education for girls. however during the microscopic study it was also know that if going to urban areas to get higher education. There are other expenses which are spends by the government.

Table No. 1.3
Non- cooperation opinion

S.No.	Opinion	Frequency	percentage
1	not intersted	06	72%
2	economics reason	104	86.67
3	doesn't get job	07	5.83
4	other reason	03	2.5
		120	100

Table No. 1.4
Cooperation opinion

S.No.	Opinion	Frequency	percentage
1	parents	81	97.2
2	coaching directors/ other teachers	20	24.0
3	teacher	17	14.16
4	other	02	1.66
		120	100

Whose assistance and inspiration were received for the education of these respondents. from the table no. 1.4 it is know that 66 percents of the vote were from their teachers while 17 percent respondents to their parents and 11% they self motivation has been decided to continue their study. The other 02 % of the people have been instructed by the coaching institute their special students and after village officially has been told.

From the all above studies it is known that tribal women awareness of education is appreciable in past decanted the information technology has enhanced the knowledge of people the people have developed understanding and have increased awareness. In rural areas they have provided them in higher education. They are coming to the cities and staying in hostels and other places and are struggling for their future. It is also pleasant that they are receiving great support from their parents and teachers. However, economics factors are compromised at many levels government should expend its facilities for this.
